Enhancements

ambiente® 7.0 contains programm supplements and enhancements in contrast to the forerunner version 6.7:

➤ **General program functionalities**

- import of model- and article lists from ambiente® *online* for the calculation
- arbitrary fonts for calculation printouts
- output an invoice overview (printable or export into file)
- revised voucher im- and export
- pleated blind/plissee available as separate material group with example articles
- minimize button available for all resolutions
- care labels: complete conversion to Ginetex (articles, label, calculation, import)
- conversion and working on article- and customer-database from raumLevel possible

➤ **3D Planning**

- new additional function: 3D interior (furniture and rugs, free rotation and positioning, adding articles, free positioning of heatings)
- new models:
 - subdivided panel curtain, panels and rail parts can be coloured separately
 - twin blind
 - decoration (scalloped)
- positioning of curtains/decorations for all directions in the same dialog
- several curtains and decorations can be coloured at once

➤ **Curtain cutting**

- New: Decoration (scalloped)

You will always find all enhancements und updates at www.deco21.de.
